Summary

As per condition 14 (a)(il), no clearing activities were performed in the preceding calendar year of January 1 to December 31, 2025.

Reporting required under Condition 14

Condition 13.1 (a)

Clearing commenced on the 17/05/2022 and was completed on the 21/05/2022. Refer to Figure 1 for zones cleared and date of clearing for each zone. As per condition 14 (a)(i), there is no records to be reported under condition 13.1 (a) of permit CPS 9219/1 as no activities were performed in the preceding calendar year of January 1 to December 31, 2025 relating to this condition. For detail relating to this process, please review Lot 500 Clearing Report 2023.

Conditions 13.1 (b)

As per condition 14 (a)(i), there is no records to be reported under condition 13.1 (b) of permit CPS 9219/1 as no activities were performed in the preceding calendar year of January 1 to December 31, 2025 relating to this condition. For detail relating to this process, please review Lot 500 Clearing Report 2023.

Condition 13.1 (c)

Each zone was cleared within the timeline of 17/05/2022 and the 21/05/2022. Refer to Figure 1 for zones cleared and date of clearing for each zone. As per condition 14 (a)(i), there is no records to be reported under condition 13.1 (c) of permit CPS 9219/1 for this report submission as no activities were performed in the preceding calendar year of January 1 to December 31, 2025 relating to this condition. For detail relating to this process, please review Lot 500 Clearing Report 2023.

Condition 13.1 (d)

As per condition 14 (a)(i), there is no records to be reported under condition 13.1 (d) of permit CPS 9219/1 for this report submission as no activities were performed in the preceding calendar year of January 1 to December 31, 2025 relating to this condition. For detail relating to this process, please review Lot 500 Clearing Report 2023.

Condition 13.1 (e)

As of May 2023, Condition 2 is complete, with the CEO notified on the 12/05/2023.

Condition 13.1 (f)

As per condition 14 (a)(i), there is no records to be reported under condition 13.1 (f) of permit CPS 9219/1 for this report submission as no activities were performed in the preceding calendar year of January 1 to December 31, 2025 relating to this condition. For detail relating to this process, please review Lot 500 Clearing Report 2023.

Condition 13.1 (g)

As per condition 14 (a)(i), there is no records to be reported under condition 13.1 (g) of permit CPS 9219/1 for this report submission as no activities were performed in the preceding calendar year of January 1 to December 31, 2025 relating to this condition. For detail relating to this process, please review Lot 500 Clearing Report 2023.

Condition 13.1 (h)

As per condition 14 (a)(i), there is no records to be reported under condition 13.1 (h) of permit CPS 9219/1 for this report submission as no activities were performed in the preceding calendar year of January 1 to December 31, 2025 relating to this condition. For detail relating to this process, please review Lot 500 Clearing Report 2023.

Condition 13.1 (i)

As of 31/01/2023, V&V Walsh have placed a conservation covenant over area shaded orange in figure 3 of schedule 2 in CPS 9219/1.

Condition 13.1 (j)

Action taken to implement the revegetation plan between 1 January to 31 December 2025.

In 2025, we completed activities for weed monitoring and revegetation monitoring in April, weed monitoring again in October, and weed spraying in December.

During the April revegetation monitoring activity, inundation of the Mitigation Area the previous season had impacted tube stock, with no surviving tube stock observed.

On 24 June 2025, we received our consultant's report on the drainage issues in the Mitigation Area along the proposed nature corridor (P422707 501), which included potential solutions to control the inundation within the area such that the proposed revegetation can establish.

During the October weed monitoring activity, inundation was observed across the Mitigation Area. Replanting tube stock within the Mitigation Area will be undertaken after this seasonal inundation issue has been resolved.

On 15 August 2025, our consultant wrote to Main Roads WA to propose options described in their report for addressing the inundation issue.

On 12 December 2025, we wrote to the City of Bunbury requesting a meeting with the City and Main Roads WA to explore solutions to this seasonal water logging issue at Lot 501.

Condition 14 Summary

As per condition 14 (a)(ii), no clearing activities were performed in the preceding calendar year of January 1 to December 31, 2025.
